DATE MAILED: 12/28/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

The

	Application No.	Applicant(s)
Office Action Summary	10/725,967	JAGER, SEBASTIAN
	Examiner	Art Unit
	Theresa Trieu	3748
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).		
Status		
1)⊠ Responsive to communication(s) filed on 09 No	ovember 2005.	
	action is non-final.	
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is		
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.		
Disposition of Claims		
4)⊠ Claim(s) <u>12 and 21</u> is/are pending in the application.		
4a) Of the above claim(s) is/are withdrawn from consideration.		
5) Claim(s) is/are allowed.		
6) Claim(s) 12 and 21 is/are rejected.		
7) Claim(s) is/are objected to.		
8) Claim(s) are subject to restriction and/or election requirement.		
Application Papers		
9)⊠ The specification is objected to by the Examiner.		
10)⊠ The drawing(s) filed on <u>17 November 2003</u> is/are: a) accepted or b)⊠ objected to by the Examiner.		
Applicant may not request that any objection to the drawing(s) be held in abeyance: See 37 CFR 1.85(a).		
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).		
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.		
Priority under 35 U.S.C. § 119	•	
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:		
1. Certified copies of the priority documents have been received.		
2. Certified copies of the priority documents have been received in Application No		
3. Copies of the certified copies of the priority documents have been received in this National Stage		
application from the International Bureau (PCT Rule 17.2(a)).		
* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 3748

DETAILED ACTION

This Office Action is responsive to the applicant's amendment filed on November 9, 2005.

Election/Restrictions

1. Applicant's election of Fig. 1 in the reply filed on November 9, 2005 is acknowledged, claims 12 and 21 are readable thereon. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Drawings

- 2. Applicants are required to shade the *lining (2)* with the shading scheme with represents an *elastomeric (rubber)* (see MPEP §608.02). Applicants are required to show clearly the apertures (5) being filled by the material (*elastomeric/rubber*) of the lining (6).
- 3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "a rotor" recited in claim 12 and "outer tube being provided with apertures" recited in claim 21, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must

Application/Control Number: 10/725,967 Page 3

Art Unit: 3748

be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

- 4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "outer tube being provided with apertures" recited in claim 21.
- 5. The disclosure is objected to because of the following informalities: page 7, line 21, "four spacers 4" should be changed to -- four spacers 6 --. Appropriate correction is required.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Application/Control Number: 10/725,967 Page 4

Art Unit: 3748

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR

3.73(b).

Claim 1 is provisionally rejected under the judicially created doctrine of obviousness-

type double patenting as being unpatentable over claim 1 of copending Application No.

10/714,812. Although the conflicting claims are not identical, they are not patentably distinct

from each other because claim 1 of the copending application "anticipates" application claim 1.

Accordingly, application claim 1 is not patentably distinct from copending application claim 1.

Here, copending application claim 1 requires elements a stator, an outer tube being provided with

a lining of elastomeric material, a rotor, two inner tubes (2, 3) disposes in the lining (6) and the

inner tubes have apertures (4, 5), while application claim 1 only requires one inner tube (4)

having apertures (5) disposed in the lining. Thus it is apparent that the more specific copending

application claim 1 encompasses application claim 1. Note that since Application claim 1 is

anticipated by copending application claim 1 and since anticipation is the epitome of

obviousness, then application claim 1 is obvious over copending application claim 8. In re

Goodman, 11 F.3d 1046, 29 USPO2d 2010 (Fed. Cir. 1993).

This is a provisional obviousness-type double patenting rejection because the conflicting

claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 12 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by any one of Agarkov (Publication Number JP61-180512) or Bostel et al. (Bostel) (Publication Number DE 3,322,095).

Regarding claims 12 and 21, Agarkov (as shown in Figs. 1-3) or Bostel (as shown in Figs. 1-4) discloses a stator for an eccentric screw pump or an eccentric worm motor having a stator, comprising: an outer tube (4 in Agarkov; 3, 4 in Bostel) that is provided with a lining (2 in Agarkov; 2 in Bostel) of elastomeric material and has a hollow space or cavity, in the shape of a double or multiple spiral, for accommodating a rigid rotor that is also in the form of a spiral, wherein said spiral of said stator has one spiral more than does said rotor, and an inner tube (5 in Agarkov; not numbered; however, clearly seen in Figs. 1-3 in Bostel) disposed in said lining (2 in Agarkov; 2 in Bostel), wherein said inner tube is provided with apertures (6 in Agarkov); the outer tube (3, 4 in Bostel) is provided with apertures (not numbered; however, clearly seen in Bostel).

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of four patents: Kopecky (U.S. Patent Number 4,313,717), Hantschk et al. (U.S. Patent Number 5,318,416), Forrest (U.S. Patent Number 5,171,138), Underwood et al. (U.S. Patent Number 5,171,139), Burger (Publication Number DE 3119568), and Jaeger (Publication Number DE 4403598), each further discloses a state of the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theresa Trieu whose telephone number is 571-272-4868. The examiner can normally be reached on Monday-Friday 8:30am- 5:00pm.

Application/Control Number: 10/725,967

Art Unit: 3748

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Thomas E. Denion can be reached on 571-272-4859. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
